Digital Strategy Assistant API

1.0.0 OAS 3.0

This API intended to deploy on aws API Gateway

[Authorize](#)

User endpoints accessible by the general public

POST /user/text_generation Generate a response from the LLM

Parameters

[Try it out](#)

Name	Description
------	-------------

session_id * required ID of the session since multiple sessions can exist within a table

string
(query)

user_info salted info of the user

string
(query)

Request body

application/json

Example Value Schema

```
{  
  "message_content": "string",
```

```

    "user_role": "string"
}

```

Responses

Code	Description	Links
200	Response with generated array and input value	No links
